INDEX TO VOLUME 56

Antipov, Y. A., Chuang, T.-J. and *Gao, H.*—On the integro-differential equation associated with diffusive crack growth theory 289

Bassom, A. P. see *Hall, I. M.*

Body, G. L. and *Ehrenmark, U. T.*—Wave generation on a plane beach by a moving pressure disturbance or by a stationary bottom protrusion 251

Bühler, K. see *Davis, A. M. J.*

Caviglia, G. and *Morro, A.*—Reflection and transmission of transient waves in anisotropic elastic multilayers 571

Chaoui, M. and *Feuillebois, F.*—Creeping flow around a sphere in a shear flow close to a wall 381

Chuang, T.-J. see *Antipov, Y. A.*

Davis, A. M. J., Bühler, K. and *Weidman, P. D.*—On secondary flow due to the coaxial rotation of two spheres: low Reynolds number theory and finite Reynolds number experiment 547

de Hoop, M. V. see *Le Rousseau, J. H.*

Destrade, M.—Rayleigh waves and surface stability for Bell materials in compression: comparison with rubber 593

Duffy, B. R. see *Holland, D.*

Eagles, P. M.—On the evolution of time-dependent localized disturbances to Dean flow in a channel with slowly varying curvature and gap-width 93

Ehrenmark, U. T. see *Body, G. L.*

Elasmi, L. and *Feuillebois, F.*—Integral equation method for creeping flow around a solid body near a porous slab 163

Evans, D. V. and *Shipway, B. J.*—A note on the uniqueness of certain water-wave problems involving two vertical cylindrical shells 347

Evans, J. D. and *King, J. R.*—The Stefan problem with nonlinear kinetic undercooling 139

Feuillebois, F. see *Chaoui, M.*

Feuillebois, F. see *Elasmi, L.*

Fu, Y. B.—Existence and uniqueness of edge waves in a generally anisotropic elastic plate 605

Gao, H. see *Antipov, Y. A.*

Gao, H. see *Michelitsch, T. M.*

Gauglitz, P. A. see *Terrones, G.*

Gilbert, A. D. see *Hall, I. M.*

Goto, T. see *Magar, V.*

Hall, I. M., Bassom, A. P. and *Gilbert, A. D.*—The effect of viscosity on the stability of planar vortices with fine structure 649

Hocking, L. M.—Contact angles and inertia for liquid bounded by an oscillating plate 271

Holland, D., Wilson, S. K. and *Duffy, B. R.*—Similarity solutions for slender rivulets with thermocapillarity 411

Howison, S. D. see *Ockendon, J. R.*

Kay, A. L. see *Leach, J. A.*

King, J. R. see *Evans, J. D.*

King, J. R. see *McCue, S. W.*

Kirkinis, E. and *Ogden, R. W.*—On helical shear of a compressible elastic circular cylindrical tube 105

Lacey, A. A. see *Ockendon, J. R.*

Le Rousseau, J. H. and *de Hoop, M. V.*—Generalized-screen approximation and algorithm for the scattering of elastic waves 1

Leach, J. A., Needham, D. J. and *Kay, A. L.*—The evolution of reaction–diffusion waves in a class of scalar reaction–diffusion equations. Initial data with exponential decay rates or compact support 217

Levin, V. M. see *Michelitsch, T. M.*

Li, J. Y.—Uniqueness and reciprocity theorems for linear thermo-electro-magneto-elasticity 35

Lukkassen, D., Meidell, A. and *Vigdergauz, S.*—On the elastic deformation of symmetric periodic structures 441

Magar, V., Goto, T. and *Pedley, T. J.*—Nutrient uptake by a self-propelled steady squirmer 65

Malevich, A. E. see *Szczepkowski, J.*

Martinsson, P. G. and *Movchan, A. B.*—Vibrations of lattice structures and phononic band gaps 45

McCue, S. W., King, J. R. and *Riley, D. S.*—Extinction behaviour of contracting bubbles in porous media 455

Meidell, A. see *Lukkassen, D.*

Merodio, J. and *Ogden, R. W.*—A note on strong ellipticity for transversely isotropic linearly elastic solids 589

Michelitsch, T. M., Gao, H. and *Levin, V. M.*—On the dynamic potentials of ellipsoidal shells 629

Mityushev, V. see *Szczepkowski, J.*

Morro, A. see *Caviglia, G.*

Movchan, A. B. see *Martinsson, P. G.*

Needham, D. J. see *Leach, J. A.*

Novozhilova, L., Pence T. J. and *Urazhdin, S.*—Exact solutions for axially varying three-dimensional twist motion in a neo-Hookean solid 123

Ockendon, J. R., Howison, S. D. and *Lacey, A. A.*—Mushy regions in negative squeeze films 361

Ogden, R. W. see *Kirkinis, E.*

Ogden, R. W. see *Merodio, J.*

Payton, R. G.—Wave fronts in wood 527

Pedley, T. J. see *Magar, V.*

Pence T. J. see *Novozhilova, L.*

Rajagopal, K. R. and *Saccomandi, G.*—Shear waves in a class of nonlinear viscoelastic solids 311

Riley, D. S. see *McCue, S. W.*

Rogers, C. see *Schief, W. K.*

Saccomandi, G. see *Rajagopal, K. R.*

Schief, W. K. and *Rogers, C.*—The kinematics of fibre-reinforced fluids. An integrable reduction 493

Shanin, A. V.—Diffraction of a plane wave by two ideal strips 187

Shipway, B. J. see *Evans, D. V.*

Shuvalov, A. L.—The Frobenius power series solution for cylindrically anisotropic radially inhomogeneous elastic materials 327

Steigmann, D. J.—On isotropic, frame-invariant, polyconvex strain-energy functions 483

Szczepkowski, J., Malevich, A. E. and *Mityushev, V.*—Macroscopic properties of similar arrays of cylinders 617

Terrones G. and *Gauglitz, P. A.*—Deformation of a spherical bubble in soft solid media under external pressure 513

Urazhdin, S. see *Novozhilova, L.*

Vigdergauz, S. see *Lukkassen, D.*

Weidman, P. D. see *Davis, A. M. J.*

Wilson, S. K. see *Holland, D.*
